SKILLS

- Frontend: React.js, Next js, TypeScript, Tailwind CSS, GSAP, Context API, Custom Hooks, Advanced UI Optimization with Framer Motion

- Backend: Node.js, Express.js, RESTful APIs, JWT (for secure authentication), Advanced Backend Communications, RabbitMQ, Backend Communications Protocol, Authentication using External Libraries

- Database: MySQL, MongoDB, Redis (Advanced Caching & Session Management)

- DevOps & Cloud: Docker, CI/CD Pipelines (GitHub Actions)

CERTIFICATIONS

- Softwere Engineer Intern By Hacker Rank
- Problem Solving By Hacker Rank
- Backend Developer By Apoorva Institute

PROFESSIONAL EXPERIENCE

Backend Developer at Zuvi8 Creatives   Aug 2023 - Aug 2024

- Managed both frontend and backend development, integrating advanced technologies for seamless user experiences and system performance.
- Designed and built responsive, dynamic web applications and software interfaces using React.js, Next.js, and TypeScript. Implemented form validation and data handling using Zod library.
- Implemented load balancers to ensure high availability and distribution of incoming traffic across multiple servers.
- Managed backend operations,

PROJECTS

Instahyre Clone

- Instahyre is an AI-based hiring platform connecting job seekers with top companies. I am developing a clone of this platform using React.js and TypeScript for the frontend, with a Node.js and Express.js backend. The project leverages Appwrite SDK for authentication and database management, along with Redis for efficient caching. Focused on core topics such as RESTful APIs, JWT authentication, and load balancing to ensure scalable and high-performance architecture.

KDS (Kitchen Delivery System)

- Created a kitchen delivery system using React.js for an interactive frontend and Node.js for a robust backend. Managed orders and kitchen processes through RESTful APIs, with MySQL for database management and Redis for caching to enhance real-time data handling.

EDUCATION

Maharashtra State Board of Technical Education, Mumbai

Diploma in E&tc
